

**Title:** Internal server error on any value greater than 989

**Steps to Reproduce :**

1. Open [Factorial Calculator](#) in a browser
2. Enter an integer that's greater than 989 (1000) into the input field
3. Click on the "Calculate!" button

**Expected Result:**

Either the correct factorial of the entered number.

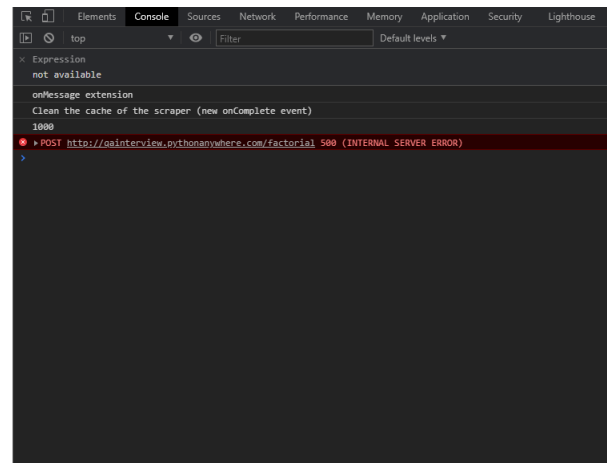

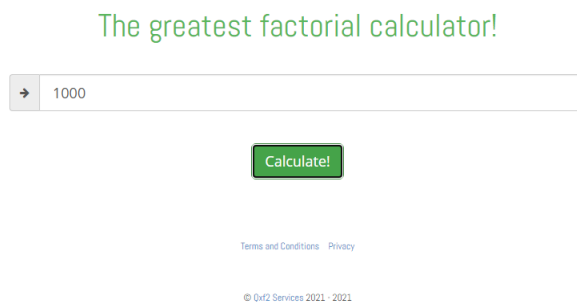

Or an error message stating that the server can't handle numbers greater than 989.

**Actual Result:**

The UI remains empty.

The console shows a "500 - Server Error" error.
